RE: Your letter of August 20, 2007 directed to Medicare Review Board

Dear Mr. Paul,

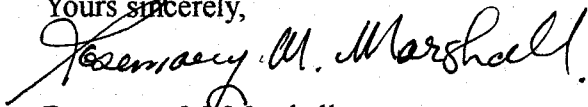

Thank you for your interest and assistance over the past several months with regard to the various issues relating to my desire to participate in the Veglin clinical trials being conducted at the University of Southern California by Dr. Parkash Gill.

Your fine letter requesting my Health Plan's consideration in authorizing my participation in the Veglin trials was highly instrumental in bringing me to the present point where I may be able to proceed. The information presented in your letter and Darla Pratt's persistence with the various agencies appears to have cleared the way and I am waiting to hear from Dr. Gill as to the next step. Thank you so much for providing the letter.

I also must commend Ms. Pratt for her unfailing support, interest and encouragement over the past months since I learned of the Foundation and what it represents to people such as myself. She has been an enormous help when I was frequently too ill to make the necessary calls myself, or availing me of her resources of where to go for information. It has been a frustrating experience for both of us in calling both Medicare and my HMO plan in that we were given so much misinformation. What a wonderful asset she is to the MRF. It is so rare to find someone so dedicated.

Hopefully I will prove to be a viable candidate for the Veglin trials. I look forward to participating in and contributing to the ongoing search for an effective treatment or cure for what I unfortunately can already verify to be a painful and challenging disease. I do feel, however, extremely blessed to have discovered that the Mesothelioma Research Foundation is in place and extend my grateful thanks to all involved, and to you personally for your invaluable assistance in all of the above respects.

Yours sincerely,

Rosemary M. Marshall
